7. Short presentation of the society: scope, members, history (max 250 words):

Estonian Society for Infection Control (ESIC) represents infection control professionals and other allied healthcare professionals (*pharmacists, Health Care College's teachers etc.*) interested or involved in infection control.

It was founded in 2003 with a core purpose to promote prevention and control of infections associated with healthcare (HAIs) and as a result to improve patient safety and healthcare quality in Estonia.

The objectives of the Society include:

- Initiating and coordinating effective communication and cooperation among healthcare professionals moderated under infection control activities;
- Development and standardization of infection control competences;
- Education and training of practitioners in infection control;
- Information dissemination by means of networking, seminars and meetings;
- Exchange of knowledge and experiences via healthcare projects.
