How can we get information about HCW's link infection control ?

Infection control link professionals network in South Western France

Counts according to national indicator of infection risk management (ICALIN)

2010	Total	With link doctor	With link nurse
Health care facilities	457	447 (97,8%)	
Departments	2814	1679 (59,7%)	2538 (90,2%)

Build 'Your Own' infection control link nurse 2011

Head : your knowledge evaluated by your colleagues

Body : your body of knowledge

Right arm : how far you feel you reach

Left arm : how much influence (muscle) you have

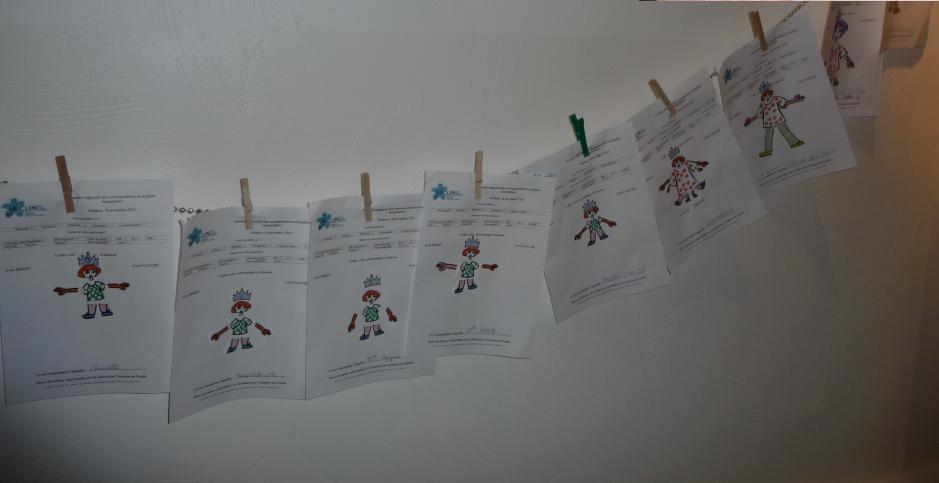

Legs : are you a trigger

*Louise TEARE
Journal of Hospital Infection 2001*

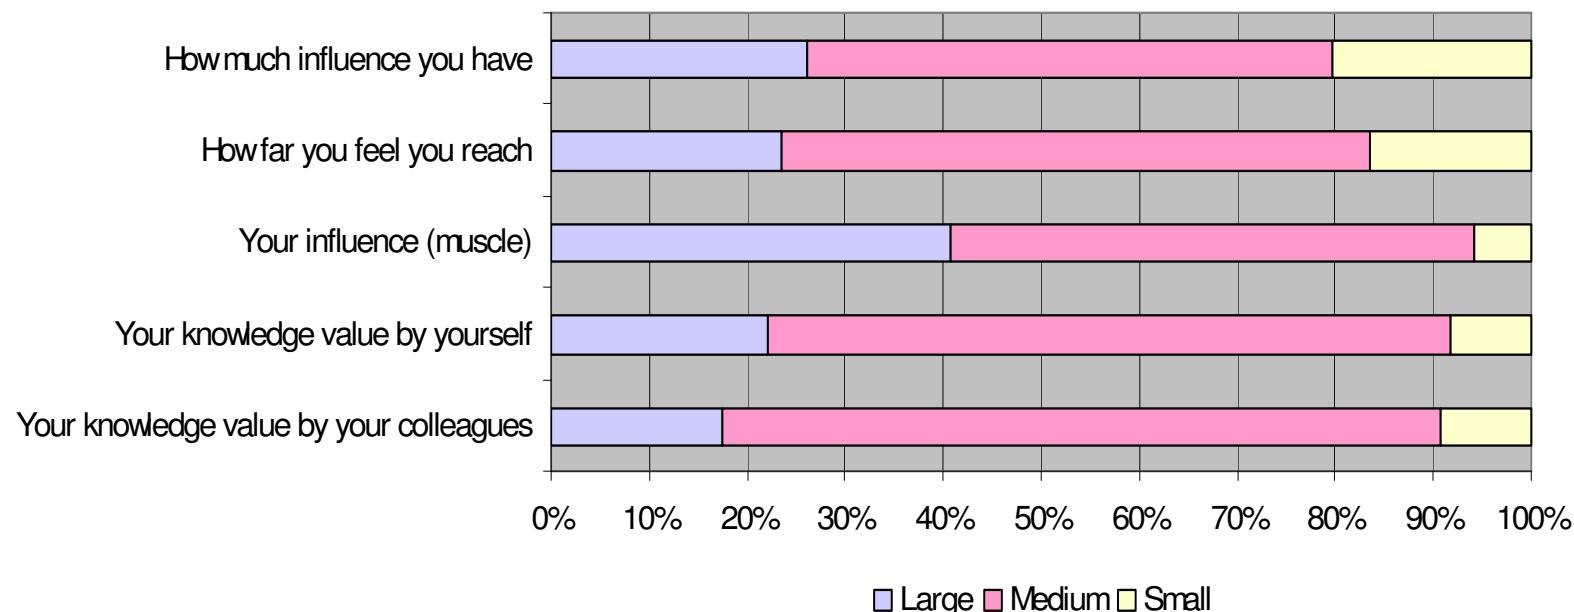

www.sf2h.net

Build ‘Your Own’ infection control link nurse: Body part analysis

**Representations of the different body parts
according to their size for each nurses,
nurse’s aids and housekeepers link
network (n = 86).**

The TIARA :

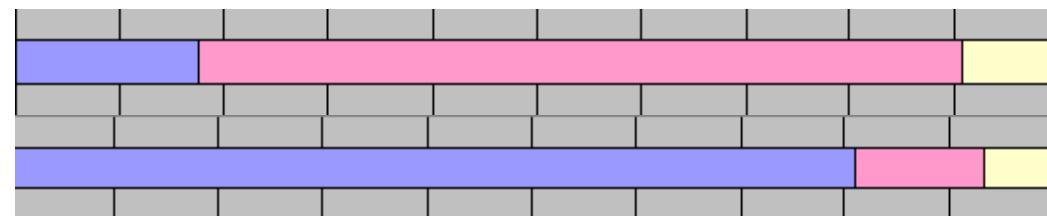

*How much status do you have
on your ward as an infection control link nurse*

Score	Criteria	N respondents
1	Have no real status	8.5% 6
2	Have low status	22
3	Have some status	30
4	Have quite a high status	11
5	My status could not be higher	2
		71

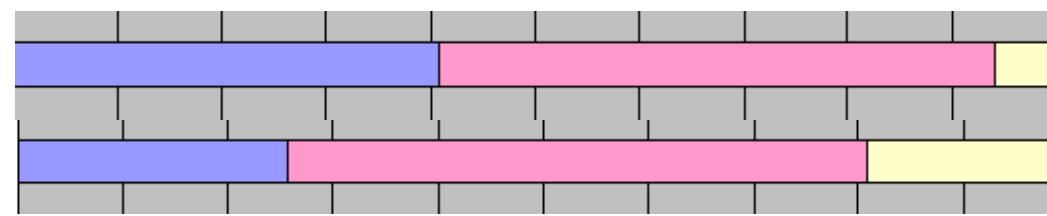

***What is your perception about infection control link HCW's actions in your ward ?
June 2012***

Knowledge self evaluation (n=86)

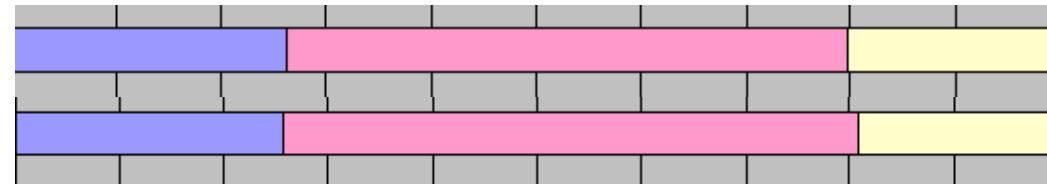

Knowledge valued by colleagues (n=90)

Influence « muscle » self evaluation (n=86)

Influence « muscle » by colleagues (n=89)

How IC legwork do you do (n=84)

How IC legwork you think they do (n=84)

0% 10% 20% 30% 40% 50% 60% 70% 80% 90% 100%

■ Large ■ Medium ■ Small

TO SUM UP

*Effective organisation
Good recognition
but no allotted time...*

What could help these workers to better achieve their missions ? (data by questionnaire 2012):

- 1 solid knowledge**
- 2 dedicated working time**
- 3 good recognition**
- 4 Better identification**

Thank you for your attention

Thanks also to
